PROFILE

Android Developer with Backend Experience

With over 5 years of experience in developing Android applications using Kotlin and Java, I specialize in creating adaptable and testable applications with optimal performance that conserves device resources. I employ design patterns such as MVVM, MVC, MVP, MVI and Repository. My expertise includes integrating AI with camera functionalities, printing from Android apps, and connecting to web servers via APIs or sockets. Additionally, I am skilled in encryption and protection using R8.

Have 2 years of experience in database analysis and development using SQL Server and Entity Framework. I also develop management systems for various organizations using Microsoft Blazor, manage system administration, train user teams, and build APIs using MVC .NET for cross-platform communication. My experience includes transitioning organizations to digital platforms. I also have basic skills in Photoshop, Figma, social media platforms, networking, and computer systems
